⏬ HT-CL Series Supplementary Instructions

The following information was changed/added to the HT-CL series instruction manual.
This addition to the instruction manual supports software version $\boxed{P\text{-}1.01}$ and later.

[Regarding Negative comparison for take away $\boxed{CPP\ 1}$]

Take-away check weighing (negative comparison) is the way to compare the negative weight while taking away objects from a container. Set the function $\boxed{CPP\ 1}$.

Note

To start the take-away check weighing, be sure to use the $\boxed{\text{RE-ZERO}}$ key to tare the weight of the container filled with objects. The $\boxed{\text{RE-ZERO}}$ key may zero the display, and the scale goes below the zero point by taking out the objects.

Function setting list

Item / Display	Parameter	Description
Normal / Negative comparison $\boxed{CPP}$	◆0	Normal comparison
	1	Negative comparison for take-away check weighing

◆ : Initial factory setting
