

IPX7 Waterproof 100 Minute Timer

IPX7 IPX7 means that even if the timer is gently submerged in a water tank containing still tap of water at room temperature to a depth of 1 meter, and left at the bottom of the tank for about 30 minutes, there will be no intrusion of water inside the timer and the timer will retain its performance.

(Almost full scale image)

Blends into the kitchen.
Comes in silver and charcoal gray colors.

Alarm is indicated by buzzer and blinking LCD backlight.
Alarm and operation sounds can be turned off.
Useful in environments where sound cannot be emitted or where consideration of surroundings is necessary.

Choose from 3 alarm sound patterns.
When using multiple timers, users can choose to set the alarms to give single, double or triple beeps to differentiate timer alarms.

Powerful neodymium magnet mounted on the back.

Pause function
Allows the timer to be paused and resumed.

Reload function
Shows the set alarm time again.

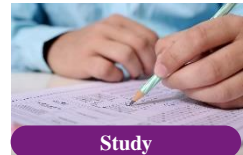

Count-up function
Counts up from 0 to 99 min and 59 sec like a stopwatch.

Kitchen: Cooking

Lab: Science Tests

Study

Attachment Methods

Magnet, hooking hole (on wall), strap hole (strap not included)

Neodymium magnet is ten times stronger than ordinary magnets and are less susceptible to deterioration of magnetic force.
